WE KNOW PCBs

Double-sided and multilayer

- HDI and high-density PTH technologies
- Fineline technology
- Special materials and hybrids
- Oversized formats up to 1.20m

Copper-inlay and metal-back

- Various Cu-coin shapes
- Embedded or extending Cu-coins
- IMS material selection
- Cavity machining

Flex, semi-flex and rigid-flex

- Stacked and staggered vias
- Partial or full flex sections
- Highly accurate laser processing
- Thin-stack and small footprint capabilities

Special technology

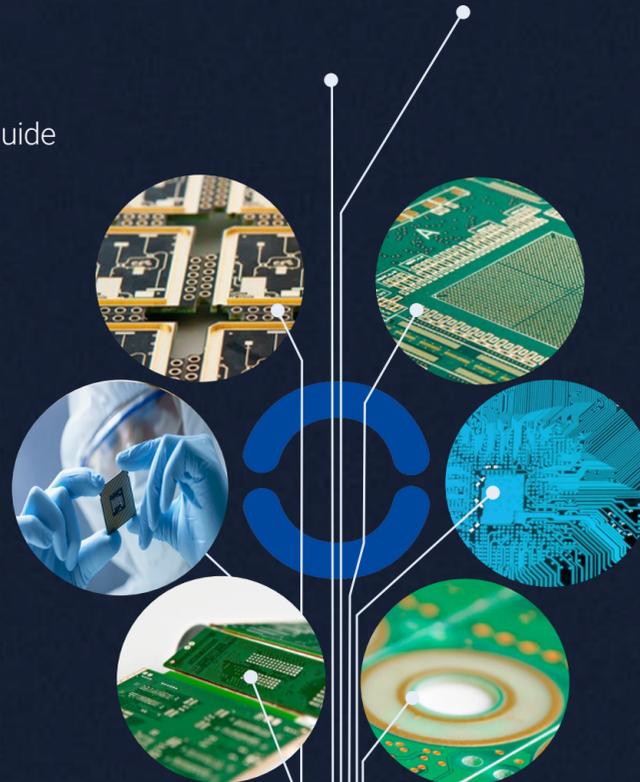

- Embedded components
- Capacitive & resistive materials
- Interposer and glass substrates
- Special surface options

High-frequency

- Advanced etching
- Wide material range waveguide and patch-antenna design
- Systems up to 200GHz

Heavy-copper

- Inner- and outer-layers
- Conventional 6 OZ, up to 12 OZ possible
- Soldermask optimized
- Resin-fill system
